3-IN-1 EXPEDITION MAGNIFIER

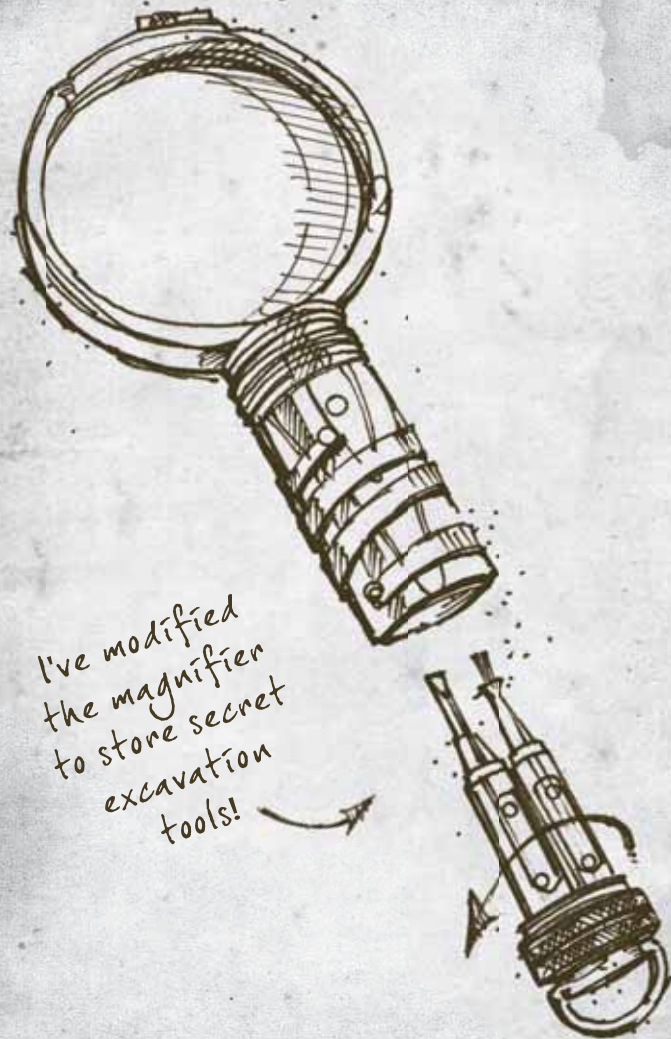

ACTIVITY GUIDE
WITH INSTRUCTIONS

 **WARNING:**
CHOKING HAZARD - Small parts.
Not for children under 3 years.

My Fellow Explorer,

Your 3-in-1 Expedition Magnifier is made with the future archaeologists in mind, with excavation tools that store perfectly in the oversized magnifier's handle. Use your new tools to make a rare and important discovery and unearth the past!

Start exploring with the activities described below, or use your imagination to think of your very own games and adventures!

BACKYARD ARTIFACTS

What treasures might be buried in your backyard? With your parents' help, use a small shovel to dig a few inches into the ground in a spot you think might hold objects worth discovering. Now, using your excavation tools, carefully extract small stones and other "gems" you might come across. Brush them clean, carefully examine their fine details with the magnifier, and keep a journal of your favorite finds!

NATURE DETECTIVE

On a bright, sunny day, go on a nature walk and look for colorful insects, flowers, and interesting plants. Use the large magnifier to observe these things in close-up detail. What do you notice that you've never noticed before? Mark your findings in a journal!

National Geographic's net proceeds support vital exploration, conservation, research, and education programs.
