

HATCHERS! Instructions

Step 1: Carefully remove the egg from the packaging and place in a large glass of room temperature water.

Step 2: Within 24-48 hours, your dinosaur will crack through the egg and grow larger.

Step 3: Remove your dinosaur from the glass when it has stopped growing. Discard the egg shells in the trash.

Step 4: The dinosaur will return to its original size if left out of the water. They will grow again when placed in water.
