

**HIGH SIERRA ECO EXPLORER™**

**ACTIVITY GUIDE**  
WITH INSTRUCTIONS

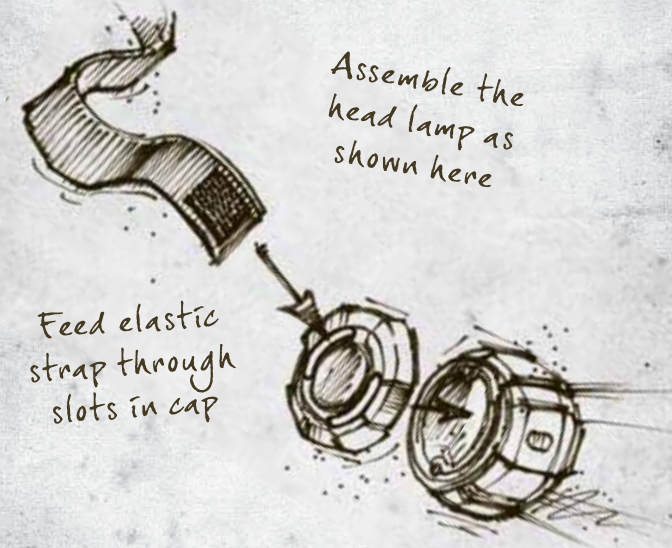

## My Fellow Explorer,

Whether you're exploring in the great outdoors or just in your own backyard, having a multi purpose tool on hand for collecting and examining all kinds of specimens is an absolute must. Your new High Sierra Eco Explorer is the perfect tool to do just that!

As a bonus, the base of the illuminated, magnified viewer converts into a useful strap-on headlamp, perfect for providing extra light when you need it.

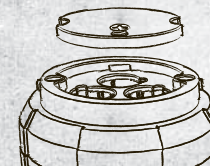

Start exploring with the activities described below, or use your imagination to think of your very own games and adventures!

### REPLACING BATTERIES

Tool required – small Phillips-head screw driver

1. Using a Phillips head screwdriver, remove the battery compartment cover.
2. Install 3 fresh AG13/LR44 button cell batteries only. Make sure the "+" and "-" ends are inserted correctly, as indicated in the battery compartment
3. Replace the battery compartment cover. Do not over-tighten screw.

Start exploring with the activities described below, or use your imagination to think of your very own games and adventures!

## RIGHT ON TARGET

Part of the excitement of using your Expedition Sky Flare is launching it and seeing where it will land. In an open area or field, create a bull's-eye-style target by making a 6 to 8 ft circle using some twine. Or, just pick a general spot for your target. Try to judge the

wind speed, then launch your flare and see how close to the target it lands. Become a Sky Flare master, seeing how accurately and frequently you can hit your target. Challenge your friends, too!

## ON THE HUNT

Have you ever wanted to go on an expedition for hidden objects? Or set out on adventure to uncover secret hiding places?

Now you can do just that, right in your own backyard! Have your parents hide five objects around

your yard. Once they're done, start hunting for the hidden objects. When you find the first one, set off your Expedition Sky Flare so your parents can see that the hunt is a success! Continue your search for the rest of the objects, setting your flare off each time you find something. Will you become an expert explorer and find all five objects?

### WARNING:

Do not look directly at the light source. Doing so can cause serious and irreparable damage.

National Geographic's net proceeds support vital exploration, conservation, research, and education programs.
